

Job Safety & Environment Analysis

Project: Bribie Island Memorial Gardens

Project No: 4044

Project Manager: Troy Pears

Completed by: Troy Pears

Job/ Task Analysed: Excavation of service trench (<1m deep)

1. Identify the task or job that needs to be analysed (all major tasks) for potential safety & environmental hazards and risks.
2. Break down the job into specific steps or tasks, and list them in sequential order.
3. Fill out the JSEA form by listing the job steps, potential hazards, and corresponding control measures. Make sure to provide specific details.
4. Review the completed JSEA form with all workers involved in the task to ensure everyone understands the identified hazards and control measures.
5. Once familiar with the JSEA all team members involved in the job/task must sign below.
