

**KEY**

The dark blue square represents the perimeter of the work zone location which will exclude members of the public from the works. This perimeter will consist of a combination of temporary fencing, site mesh and safety signage. All site vehicles must be parked safely and appropriately within this site barrier.

The green rectangle represents the location of the project area that will be used for the site office and amenities.

The brown rectangles represent the double gates used for all site access and egress. These gates will be kept closed when not in use and locked when the site is closed. All vehicles including deliveries that need to enter site must only use these entry/ egress points.

The yellow rectangle represents the location of the project area that will be used for staging, deliveries, and site parking

The red rectangle represents the location of the skip bin, to be used for waste management purposes. Any reusable or recyclable materials will be removed from site for future use.

The dark pink sections represent the temporary barriers to be erected during the trenching and footpath installation stages of the works. These barriers will consist of safety mesh, signage and weighted bollards. These barriers will only be present during the trenching and footpath works and will be removed once these works are complete.

The orange rectangle represents the location where the traffic control worker will be stationed during the road works. This worker will inform incoming motorists of the closure of the road and direct them to the parking spaces that are unimpeded by the works. These workers will also inform the public how to enter the gardens safety on foot.

The black rectangle represents the traffic control signage that informs motorists of the road closure during the road trenching works. These signs will also inform the public how to enter the gardens safety on foot. These signs will only be present during the road trenching works and will be removed once this area has been made safe.

The light pink arrows represent the travel routes of site vehicles coming onto site and leaving site. All vehicles including deliveries that need to enter site, must adhere to these entry and exit routes.

The light blue arrows represent the travel routes of public vehicles coming into the memorial gardens and leaving the memorial gardens during the road closure works. Traffic control personnel and traffic control signage will be present during these works to guide motorists to the unimpeded parking areas and into the gardens.

The light grey arrows represent the routes members of the public will use to enter and exit the memorial gardens whilst the trenching works are underway. Members of the public will be guided to this entry and exit route via the traffic control personnel and traffic control signage.
